Rafael Guevara Hernández

Cybersecurity Engineer | Incident Response and Malware Analysis

Mexico City, Mexico | (+52) 442 287 6755 | rafagh00@gmail.com
linkedin.com/in/rafael-g-17236b221 | github.com/alephnan

Cybersecurity engineer with **3+ years of professional experience** in incident response, malware analysis, and SOC operations. **Five years using Linux/Unix and Python** across employment, university, and labs. Applies AI automation to investigations and communicates findings to technical and executive audiences.

PROFESSIONAL EXPERIENCE

SCITUM Mexico City, Mexico

Senior Cybersecurity Engineer

Security Services Analytics III | Apr 2024 - Present

- Participate in incident response across Windows Server and Linux environments at organizations with approximately 1,000 to more than 30,000 endpoints.
- Support ransomware and trojan investigations involving WannaCry, LockBit 3.0, and ALPHV/BlackCat.
- Investigate Cortex XDR events to identify threats and support containment and remediation.
- Analyze malware statically and dynamically to extract IOCs and inform defensive countermeasures.
- Build Python and LLM pipelines for alert correlation, threat enrichment, incident triage, and reporting.

Cybersecurity Intrusion Specialist

Advanced Threats | Mar 2023 - Mar 2024

- Triaged endpoint, SIEM, and firewall events with Cortex XDR and Splunk; enriched investigations with threat intelligence and malware-derived IOCs.

Jr. SOC Engineer

Jan 2023 - Mar 2023

- Monitored and escalated Splunk/FortiSIEM alerts; inspected network traffic with Wireshark and tcpdump.

SECURITY AUTOMATION PROJECTS

AI Threat Triage Pipeline
Designed a multi-agent AI system for incident triage, runbook extraction, and SOAR payload construction.

Cortex XDR IOC Uploader
Built a tool to validate and upload IOCs across tenants with batching, retries, and reporting.

PE Malware Analysis Toolkit
Built offline PE inspection, YARA matching, and IOC extraction with HTML/JSON reports.

VirusTotal and AbuseIPDB Integrations
Built MCP servers that connect AI agents to threat intelligence for IOC lookups and log enrichment.

TECHNICAL SKILLS

AI and automation
LLM-assisted analysis, RAG architectures, multi-agent workflows, MCP integrations.

Malware and network tools
YARA, REMnux, FLARE VM, Sysinternals, x64dbg, IDA (basic), Wireshark, tcpdump.

Platforms and scripting
Cortex XDR/XSIAM, Splunk, FortiSIEM, CrowdStrike Falcon; Python, Bash, PowerShell, SQL, REST APIs.

Frameworks
MITRE ATT&CK, Cyber Kill Chain, OWASP Top 10.

EDUCATION

B.S. in Applied Mathematics
Instituto Tecnológico Autónomo de México (ITAM)
2018 - 2023

CREDENTIALS AND TRAINING

Palo Alto micro-credentials
Cortex XDR Consultant (PMXdC); Cortex XDR Support Engineer (PMXdS).

TryHackMe
#1 in Mexico; global top 1%.
Ranking achieved in 2024

Completed SOC L1/L2, Red Teaming, Offensive Pentesting, Cyber Defense, and Security Engineer learning paths.

LANGUAGES

Spanish: Native
English: Proficient
IELTS score: 7/9.
